

TECHNICAL DATA

Width: 410 mm

Height: 360 mm

Depth: 560 mm

Voltage: 230V/400V 50 Hz (3-phase current)

Output: 3 kW

Weight: 47 kg

Electric cable length: 3.0 meter

Hose length: 2.5 meter

Heating time to 85°C: approx. 20 minutes

Max. working temperature setting: 85°C

Accessories Available

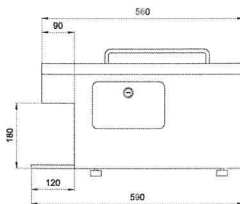

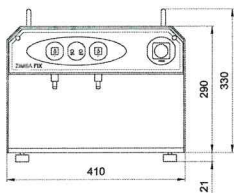

- Discharge connection pieces
- Suction hoses to the length required
- Cleaning agents for the ZimsaFix
- Spare filters
- Mobile stand in non-corroding special steel (height 800 mm)

MULLED WINE

Up to the minute design - technology for the future from Hoerburger

- Housing in non-corroding special steel
- Simple, easy to use operating elements
- Space saving of up to 90% compared to the traditional systems
- Fill with any amount as required from 0.1 liter to approx. 0.4 liter to suit all different sizes of glasses.
- When filled with 0.2 liter per glass, at least 300 servings per hour are possible at a required serving temperature of 65°, on both dispenser faucets.
- There are two systems working separately in one machine, which means that two different beverages can be served.
- Cleaning is easy by means of a built-in rinsing program.

PUNCH

CIDER

- No loss caused by untapped drinks being left in the machine, no loss of taste in the drinks because only the amount required for serving is heated.
- Integrated counter system for better control when used by outside staff. Only authorized persons have access to the filling amount regulator and counting mechanism.
- It is possible to switch off the heating element so that during the warmer seasons, the machine can also be used for serving pre-cooled beverages in the correct portions.
- The ZimsaFix conforms with the latest EU guidelines and directives.

TEA

Professional Beverage Serving Machine for mulled wine, grog, punch etc.

- The machine is ideally suited for mass preparation and serving of hot drinks for example in mountain stations, ski chalets, canteens, gastronomy, après-ski bars and at large events all the year round.
- High capacity performance coupled with ease of operation. After switching on the machine it is ready for use in only 20 minutes.

The ZimsaFixDuo is suitable for:

- mulled wine, grog
- punch, cider, tea
- hot chocolate
- fruit juice (without fruit flesh) and all other beverages which do not contain solid ingredients.
